

Council Member :

I want to applaud Metro Council for creating the Energy Innovation Fund. It is good to know that money saved through energy efficiency will be used to further reduce our carbon footprint. Nonetheless, you need to do more. As you review the upcoming budget, please find a way to provide seed funding for the Energy Innovation Fund. I think budgeting an additional \$500,000/yr would help tremendously to meet the 2030 goal of Metro Government operations using only clean renewable energy.

Sincerely,
